🎓 EDUCATION

B.Tech in Artificial Intelligence & Machine Learning,
Vishwakarma Institute of Technology, Pune
2024 – 2028 | Pune
CGPA (Current): 8.85

🧠 SKILLS

Programming Languages

Python, Java, C++, C, SQL, JavaScript, TypeScript

AI & Machine Learning

Large Language Models (LLMs), AI Agents, Retrieval-Augmented Generation (RAG), Prompt Engineering

Frameworks & Libraries

React, Node.js, Express.js, FastAPI

Databases

PostgreSQL, MongoDB, MySQL, Redis

Tools & Technologies

Git, GitHub, Docker, REST APIs, WebSockets, Arduino, TensorFlow

🔗 RESEARCH EXPERIENCE

Magnetic Levitation Based Smart Road Prototype

- Designed and built a magnetic levitation road prototype demonstrating frictionless vehicle movement.
- Implemented electromagnetic propulsion and sensor-based control mechanisms.
- Explored future transportation concepts inspired by Maglev technology with emphasis on efficiency and sustainable mobility.

🏆 EXTRACURRICULAR ACHIEVEMENTS

Finalist (Top 6 Teams) – PICT Credenz Hackathon

Developed a carbon auditing platform for emission tracking.

Finalist (Top 8 Teams) – Codebits 4.0 (24 Hours)

Built a system predicting downstream impacts of city events using urban data.

Finalist – AIBoomi 24-Hour Hackathon

Developed DevGuard, an AI-powered code security and credibility platform.

📁 PROJECTS

Navio, AI Powered Super App Platform

- Building an AI-first super app integrating travel, commerce, food delivery, payments, and productivity services through intelligent AI agents.
- Designed a modular microservice architecture for scalable and extensible service integration.
- Implemented conversational workflows and unified authentication for seamless user experience.
- Technologies: Node.js, React, TypeScript, PostgreSQL, MongoDB, Docker

Sentinel AI, AI Security & Monitoring Platform

- Developed an AI-powered monitoring platform that analyzes logs and infrastructure using LLM-based reasoning.
- Implemented anomaly detection, root cause analysis, and intelligent incident explanations.
- Built scalable backend APIs with real-time monitoring capabilities.
- Technologies: Python, FastAPI, PostgreSQL, Redis, OpenAI API, Docker

SilentBridge, AI Sign Language Translation System

- Developed an intelligent wearable glove that converts sign language into text and speech in real time.
- Integrated embedded sensors with machine learning models for gesture recognition.
- Designed an assistive communication system focused on accessibility.
- Technologies: Arduino, Python, TensorFlow, IoT, Speech APIs

Trading Engine,

Algorithmic Trading & Market Intelligence Platform

- Developed a modular trading platform for strategy development, backtesting, and portfolio analysis.
- Implemented real-time market data processing using WebSockets.
- Integrated AI-assisted insights for strategy evaluation and risk management.
- Technologies: Python, FastAPI, PostgreSQL, React, Docker, WebSockets
